

RecoPly

PRODUCT DESCRIPTION

RecoPly is a robust, durable ply board sheet which has a coarse underside and a smooth, finished upper surface. It is an outstanding alternative to traditional unfinished plyboard or marine ply and has excellent properties for use in construction, agricultural and leisure applications.

With an unparalleled life expectancy and easy to handle, these recycled plastic ply board sheets have been proven to be resistant to water and moisture while also removing the need for maintenance, eliminating the dangers of rot and as are 100% wood-free, do not splinter.

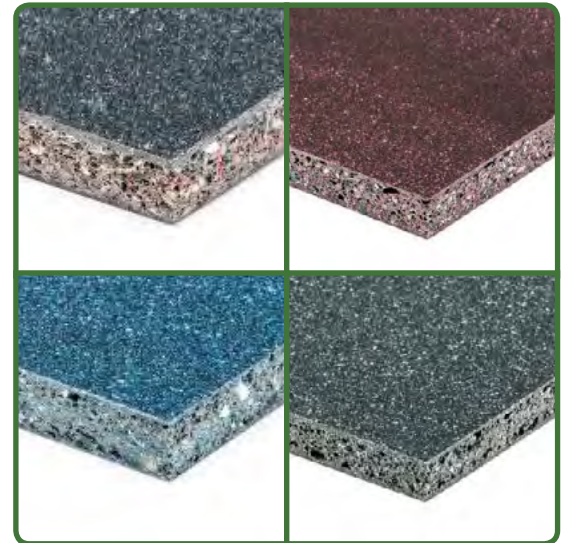

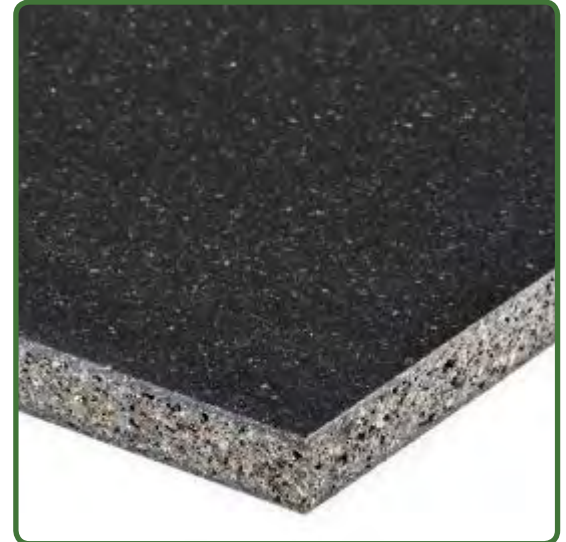

RecoPly sheets can be processed in practically the same way as wood, it can be drilled, milled and sawn. They can be affixed using standard hardware such as screws and connectors.

The RecoPly waterproof ply board sheets are available in widths of 12mm and 19mm, with or without anti-slip surface treatment and in five colours: dark grey, black, green, blue or red.

PRODUCT USES

- Architectural applications such as concrete formwork and shuttering
