Anchor Peg

Strong And Robust Anti-Pull Fixing Solution

Anti-pull anchor pegs are the ideal fixing solution for grass reinforcement mesh, membranes and much more. Manufactured from **robust** plastic, each peg is **strong, weather resistant, versatile** and **easy to install**. The ribbed design means that each anchor peg cannot be easily pulled up by passing foot or vehicle traffic as to remove it, you must twist it or work it free. Available in packs of 1, 25, 50 and 100, these pegs are safer, harder to pull up and more effective compared to metal pins. You can also used these pegs with white delineators to create road markings, parking spaces, foot paths and borders.

KEY FACTS

- » Spike length: **160mm**
- » Head width: **130mm**
- » Spike diameter: **12mm**
- » Unit weight: **17g**
- » Pack sizes: **1, 25, 50 & 100**
- » Colour: **Green**
- » Material: **Durable plastic polymer**
- » Anti-pull ribs: **Yes**
- » Optional Extras: **White delineators**

APPLICATIONS

- TURFMESH**
Anchor pegs secure TurfMesh well and can handle the weight of vehicles
- GRASSMESH**
Securing GrassMesh in place under pedestrian and machine traffic
- GROUND REINFORCEMENT**
Anchor pegs can be used to fix ground reinforcement grids in place on inclines
- MEMBRANE**
Anchor pegs can be used to secure all membranes in a host of projects
- GARDEN NETTING**
A strong fixing to hold garden netting in place and keep out birds and pests
- PROTECTION FLEECE**
Anchor pegs used to secure plants and crop fleeces and fix them in place

Installation Instructions

1. Follow the installation guide of the product or products you are wanting to install for your project up to the point where you are needing to use your anchor pegs. You can continue following that installation guide once your pegs and product are in securely fixed in place.
2. With your TurfMesh, GrassMesh, membrane, netting, fleece or mulch in place you can begin using your anchor pegs.
3. We recommend using one anchor peg at 1 metre intervals. Knowing this, ensure you have ordered enough anchor pegs to secure your entire area. More can be used dependent on the intended use or the circumstances of the installation.
4. Using a rubber mallet, hammer each peg at the recommended intervals through a gap in the mesh or netting or pierce your membrane, fleece or mulch. Hammer the fixing pegs down until each one is sitting flush with your product.
5. Repeat this process until you have secured the entire area using your anchor pegs and you are satisfied your product will not migrate.
6. If you are needing markings on your installation, you can use a white delineator which fits perfectly into the hole on the head of each anchor peg. By using delineators you can create car parking spaces, road markings, walkways and borders.
7. Continue with the rest of your installation.

WITH TURFMESH

Anchor pegs fit perfectly in to the shape of TurfMesh to fix each roll in to the ground as securely as possible

WITH GRASSMESH

The pegs match the colour of GrassMesh and are much safer for use around children & animals

DELINEATOR (OPTIONAL)

White delineators fit perfectly into the top of anchor pegs to mark out parking spaces, roads, paths & more

PRODUCT CODE	COLOUR	DESCRIPTION	DEPTH (mm)	DIMENSIONS (mm)	PACK SIZE	UNIT WEIGHT (kg)
TMAP160G	Green	Plastic Anti-Pull Anchor Peg	12	160mm x 130mm	1	0.017
