

Plastic Fixing Pegs

Black plastic ground anchors ideal for grass mats & membranes

Our black fixing pegs are the perfect product to use for securing the a large range of landscaping, gardening and agricultural products into the ground. The **weather resistance, ease of use, versatility** and **strength** of these fixings makes them a very popular choice for both commercial and domestic users. One of the most common applications for the black fixing pegs is with rubber grass mats, each mat requires 5 **durable** pegs to hold it in situ for years to come. The sharp point on each fixing peg means it is easy to pierce through membrane sheets and into both firm and soft ground so products can be held in place regardless of the ground conditions below.

- RUBBER GRASS MATS
- RUBBER PLAY TILES
- BELT CONVEYORS
- STEEL FIXING PINS
- PLASTIC FIXING PEGS

Fixing pegs used to hold down and secure all the edges of anti-bird netting
- TREE MULCH MATS**
Pegs used to pierce through the mulch mats & into the ground around the tree
- PROTECTION FLEECE**
Our pegs are used to secure crop fleeces to fix them in place

Installation Instructions

1. Follow the installation guide of the product or products you are wanting to install for your project up until the point of using your black plastic fixing pegs. You can continue following that installation guide once your pegs are in place and secure.
2. With your rubber grass mats, membrane, netting, fleece or mulch in place you can begin using your fixing pegs.
3. We recommend using 5 pegs per sqm so ensure you evenly spread the anchors around for even security. More can be used dependent on the intended use.
4. Using a rubber mallet, hammer each peg through a hole in the grass mat, edging or netting or pierce your membrane, fleece or mulch. Hammer the fixing pegs down until each one is sitting flush with your product.
5. Repeat this process until you have secured the entire area and you are satisfied your product will not migrate.
6. Continue with the rest of your installation.
