SoRoTo[®]
HARD WORKING SINCE 1986

Belt Conveyors

Transport Site Materials and Debris

Ideal for moving large amounts of different materials or debris around sites without the need for manual effort, SoRoTo Belt Conveyors are truly a workhorse of any construction site. With a lightweight, modular design and made from durable aluminium, the belt conveyors can move a wide range of different materials including wet concrete, hay, wood-chips and site rubble. The carriage design allows the belt conveyor angle to be adjusted within minutes according to the required application. A super-portable design means that the whole range of belt conveyors can be manoeuvred around site by a single individual, even the enormous 8.0m, meaning you get your materials where they're needed, when you need them.

SWAPPABLE FEEDER

Two different feeders are available allowing for use with wheelbarrows

CARRIERS

Swappable belts allow for conveying of different materials with different height carriers

SELF-CLEANING

Holes in the undercarriage allow for dirt to pass through rather than build up

SELF-ADJUSTING RELAY

Enabling the conveyor to cut out in the case of overload, protecting the conveyor, your materials and operatives alike

LIGHTWEIGHT

Made from aluminium which is light but durable, SoRoTo Belt Conveyors can be moved by one person

MODULAR

The modular plates can be removed and replaced in short sections and fit all sizes, giving you flexibility

KEY FACTS

- » Moves up to 322 tonnes per day
- » 110/230v motor variants
- » Forward and reverse operation
- » Two-wheel, snap-on/snap-off undercarriage
- » PVC/Aluminium side battens
- » Protective motor switch & thermal cut-off
- » PVC belt with 10mm high carriers
- » Optional belts with 30mm carriers, without carriers or high tensile
- » Modular design means it can be as short or long as needed
- » Incline can be adjusted

APPLICATIONS

BRICKS/BLOCKS

Save on labour costs and increase productivity

RUBBLE/DEBRIS

Remove mixed rubble and debris more safely thanks to reduced handling

HAY/STRAW

Moving this cumbersome material can be done simply with a conveyor

GRAVELS

Easily transport loose or bagged aggregates and gravels

BAGGED MATERIALS

Such as cement or plaster can be securely moved around site

WET CONCRETE

Even large amounts of wet concrete can be conveyed across sites easily

	2.0M	3.3M	4.5M	6.0M	8.0M
Motor Voltage	110/230v			400v	
Output	0.5kW			0.55kW	
Belt Speed	32cm/sec				
Length	220cm	330cm	450cm	600cm	800cm
Weight	45kg	65kg	85kg	100kg	120kg
Max Belt Loading (End-to-End)	150kg	247.5kg	337.5kg	450kg	600kg
Belt Material	PVC				
Belt Width	34cm				
Frame Material	Aluminium				
Frame Width	48cm				
Frame Height	23cm				
Max. Inclination	30/45°
