GCL PRODUCTS NOW PROUDLY STOCK OX TOOLS AND LEESON POLYURETHANE PRODUCTS

PRESS RELEASE FOR RELEASE ON OR AFTER 06/10/20

Further developing the PermaPave brand of resin bound gravel products, GCL Products Limited are proud to announce the addition of Ox Tools and Leeson Polyurethanes products to their range

GCL Products are proud to announce the addition of PermaBound UVR, a polyurethane resin bound gravel binder, produced by Leeson Polyurethanes, a leading manufacturer, along with Ox Tools, one of the best known names in resin bound gravel tools.

Resin bound gravel has seen a meteoric rise in popularity over the past several years due to its immense strength, effortless aesthetics and varied range of colours. This rise in popularity has resulted in many suppliers including polyurethane resin binders in their range in a bid to establish their name as synonymous in the market. Unfortunately, not all polyurethane binders are created equally and this has brought an element of doubt and uncertainty over the viability of widespread use of resin bound gravel in the UK.

In a bid to cut through this, GCL Products have teamed up with Leeson Polyurethanes, a leading manufacturer of polyurethane adhesives and coatings, to produce PermaBound UVR resin gravel binder. A BBA-approved formulation which offers consistency, ensures quality and a superior final finish, PermaBound UVR is up to three times stronger than other resin binder products. GCL Products are proud to be working with Leeson and PermaBound resin joins a range of products which features some of the most well-known brands in the UK resin bound gravel market, such as Ox Tools, SoRoTo forced action mixers and Daltex specialist aggregates.

Fergus Slack, Managing Director of GCL Products Limited said “We’re incredibly proud of the PermaPave brand and the partnerships with Leeson Polyurethanes and Ox Tools will help to offer an assurance of quality to our customers.”

GCL Products Limited are a specialist supplier of products to contractors working in the groundworks, construction and landscaping sectors. Founded in 2008, GCL Products are one of the fastest growing independent sector suppliers.
