

RecoEdge

Plastic Edging

RecoEdge is a **tough and weather-resistant** lawn and garden edging solution. It is ideal for use in a wide variety of applications to **create a strong and decorative separation** between two or more landscaped areas. With a unique textured appearance, this edging roll **can be installed on straight borders or can be contoured** to create divisions around bends and circles. This effective edging solution will eliminate crumbling edges, prevent plants and grass from growing outside of their boundary and avoid gravel or other material migration. It is **available in three colours** and is the ideal solution for around lawns, flower beds, pathways, vegetable patches, patios and more.

Installation Instructions

1. First, dig a trench where you wish to install the RecoEdge garden edging.
2. Lay the edging vertically into the trench.
3. Push or mallet a RecoStake at approximate 1m intervals just behind the edging.
4. Screw the edging to the stake and use a chipboard screw.
5. Back-fill the area to create a smooth surface.
6. Landscape the area how you wish.
